

Here's a **step-by-step guide** to install **Chocolatey (choco)** on Windows:

✓ 1. Open PowerShell as Administrator

- Press `Win + X` and choose **Windows PowerShell (Admin)** or **Terminal (Admin)**.
 - Confirm UAC prompt (click “Yes”).
-

✓ 2. Run the Official Install Command

Copy and paste this into PowerShell and press **Enter**:

```
Set-ExecutionPolicy Bypass -Scope Process -Force; `
[System.Net.ServicePointManager]::SecurityProtocol = `
[System.Net.ServicePointManager]::SecurityProtocol -bor 3072; `
iex ((New-Object
System.Net.WebClient).DownloadString('https://community.chocolatey.org/install.ps1'))
```

This will:

- Bypass execution policy just for this session
 - Download and run the official Chocolatey install script
-

✓ 3. Verify Installation

Once done, close and reopen **PowerShell**, then run:

```
choco --version
```

If you see a version like `1.4.0`, it's installed and working.

⚠ If You See “Chocolatey Already Installed”

It means Chocolatey exists at `C:\ProgramData\chocolatey`.

To reinstall:

1. Delete the folder:

```
Remove-Item -Recurse -Force C:\ProgramData\chocolatey
```

2. Then re-run the install command above.

How to install helm

```
choco install kubernetes-helm
```

```
Do you want to run the script?([Y]es/[A]ll - yes to all/[N]o/[P]rint): y
```

```
PS C:\Windows\system32> helm version
```

```
version.BuildInfo{Version:"v3.18.2", GitCommit:"04cad4610054e5d546aa5c5d9c1b1d5cf68ec1f8",
```
